There are other methods of getting people to sign up.

These may be less effective, more effective, or just as effective as the previously mentioned method.

You can use sites similar to MinuteWorkers, such as ShortTask.

<http://www.shorttask.com/>

Remember, there are tons of sites out there on the internet designed to help people make money.

I am not going to go too far into the next couple of methods because they are pretty self explanatory, but there are other ways to get people to sign up under your 000webhost affiliate link.

One way is forums. 000webhost offers a wide variety of tools to help get your links out.

If you go back to: <http://www.000webhost.com/affiliates/>

And click on:  **Get Banners**

There are tons of banners that you can put in your forum signature, or even a website that you own!

Now, there are also other resources that 000webhost affiliates have access to.

One is:  **Promotional Texts**

Do you have a large email list? These can easily be obtained, and with promotional texts, you can send out massive emails containing your referral link. They save seven different promotional texts!

☐ Text No. 1:

Hi all,

I think this information can be useful for you. If you plan to get your website, here is one good free web hosting provider to choose - 000webhost.com

They provide hosting absolutely free, there is no catch. You get 1500 MB of disk space and 100 GB bandwidth. They also have cPanel control panel which is amazing and easy to use website builder. Moreover, there is no any kind of advertising on your pages.

You can register here: <http://www.000webhost.com/334794.html>

That was just an example of one.

As you can see, they have some very convincing emails that you can send out to make money off of.

Another great tool is the:  **Forum Finder Tool!**

How it works?

1. Enter any keyword in a box above or click on any keyword most popular keyword lists below.
2. You will get a list of forums.
3. Go to each forum (you may need to navigate to the forum index in order to see all forum sections), register, find the most appropriate section (usually it is "General Discussion" or "Advertising" or any other may fit) and post new thread. Do not forget to include you affiliate link in signature! You don't need to write any advertisements, you can take one from our ["Promotional Texts"](#) page.
4. Enjoy the traffic flow and increasing signups list!

Tips:

- use your affiliate link in your signature and post content.
- try to search for "free hosting" on each forum, maybe there was some discussion about free web hosting providers already, so you can add your reply there.

That bit of text was taken from the Forum Finder Tool instructions.

000webhost also gives you the best converting keywords to make your money making experience all worth the while.

This E-book is just about through.
